OFFICE OF PRICES AND LIVING CONDITIONS
Kenneth V. Dalton, *Associate Commissioner*

The CPI Detailed Report is a monthly report on consumer price movements, including statistical tables and technical notes. The report covers two indexes, the Consumer Price Index for All Urban Consumers (CPI-U) and the Consumer Price Index for Wage Earners and Clerical Workers (CPI-W). The indexes reflect data for the U.S. city average and selected areas.

This publication may be ordered from the Superintendent of Documents, U.S. Government Printing Office, Washington D.C. 20402. Subscription price per year $25 domestic, and $31.25 foreign. Single copy domestic, $4; foreign, $5. Send correspondence on circulation and subscription matters (including address changes) to the Superintendent of Documents.

CPI MAILGRAM provides selected U.S. City Average data for CPI-U and CPI-W within 24 hours of release. Order from: National Technical Information Service, 5285 Port Royal Road, Springfield, Virginia 22161. Subscription rates: $125 in contiguous U.S. and Hawaii; $135 in Alaska and Canada.

Material in this publication is in the public domain and may be reproduced without permission of the Federal Government. Please credit the Bureau of Labor Statistics. Second-class postage paid at Washington, D.C., and at additional mailing offices.

February	March 25	May	June 20
March	April 22	June	July 23
April	May 21	July	August 21

NOTE: The Bureau of Labor Statistics currently is completing a major revision of the Consumer Price Index. Beginning with release of the CPI for January 1987 on February 27, the Bureau will introduce revised versions of the current CPI's both for All Urban Consumers and for Urban Wage Earners and Clerical Workers. The revised CPI's will reflect more current population and spending patterns and numerous technical enhancements. See page 3 for further details.

Price Movements
January 1986

The Consumer Price Index for All Urban Consumers (CPI-U) increased 0.3 percent before seasonal adjustment in January to a level of 328.4 (1967 = 100). For the 12-month period ended in January, the CPI-U increased 3.9 percent.

The Consumer Price Index for Urban Wage Earners and Clerical Workers (CPI-W) rose 0.3 percent in January, prior to seasonal adjustment. The January 1986 CPI-W level of 324.3 (1967 = 100) was 3.7 percent higher than the index in January 1985.

CPI for All Urban Consumers (CPI-U)—seasonally adjusted changes

On a seasonally adjusted basis, the CPI-U rose 0.3 percent in January. This compares with increases of 0.6 and 0.4 percent in November and December, respectively, and is the same as the average monthly rate of advance since the fall of 1981. In January, smaller increases in the energy and food components, which had advanced substantially in the last 2 months of 1985, were largely responsible for the more moderate rise in the overall CPI. A decline in clothing prices and a smaller increase in the cost of medical care also contributed to the slowdown. However, substantially larger increases in January than in other recent months were registered for the entertainment and other goods and services components.

The food and beverage component rose 0.3 percent in January. Grocery store food prices also rose 0.3 percent in January, after registering increases of 0.8 percent in both November and December. A decline in the index for meats, poultry, fish, and eggs and a smaller, but still substantial, increase in fruit and vegetable prices were responsible for the moderation. Beef prices, which had increased 6.0 percent in the fourth quarter of 1985, declined 0.9 percent in January. Prices for poultry and eggs also turned down in January, while pork prices were virtually unchanged. On the other hand, a sharp price increase was recorded for fish and seafood. The smaller increase in fruit and vegetable prices was attributable to a sharp deceleration in fresh vegetable prices, which were unchanged in January following seasonal adjustment. Fresh fruit prices registered their second consecutive large increase in January, while prices for processed fruits and vegetables—up 0.1 percent—continued their recent near-stable behavior. Among other grocery store foods, the indexes for cereal and bakery products and dairy products were up slightly while the other food at home component, reflecting a sharp increase in coffee prices, rose 0.6 percent. The other two components of the food and beverage index—restaurant meals and alcoholic beverages—rose 0.2 and 0.5 percent, respectively.

The housing component increased 0.3 percent in January, the same as in December. The deceleration in the cost of household fuels—unchanged in January,

Other goods and services	.8	.5	.3	.5	.3	.6	1.0	7.9	6.1

following a 0.4-percent increase in December—was offset by an acceleration in the charges for other utilities and public services. The other two major housing groups—shelter costs and household furnishings and operations—rose 0.4 and 0.1 percent, respectively, in January, the same as in December. Within fuels, a 1.3-percent decline in fuel oil prices was offset by increases of 0.6 and 0.1 percent in the indexes for electricity and natural gas, respectively. Shelter costs rose 0.4 percent, with renters' and homeowners' costs each up 0.3 percent, and maintenance and repair costs up 1.4 percent.

The transportation component advanced 0.5 percent in January, following a 0.4-percent increase in December. The moderation in transportation energy costs was more than offset by larger increases in public transportation fees, automobile insurance costs, and used car prices. Although pump prices declined, the index for gasoline rose 0.1 percent, after seasonal adjustment. This, however, compares with a 1.3 percent increase in the last 2 months in 1985. Despite these recent advances, gasoline prices remain well below—11.4 percent—their peak of March 1981. New car prices also rose less in January—up 0.1 percent—than in recent months and automobile finance charges registered a larger decline than in the preceding month. The index for public transportation, which was unchanged in December, rose 1.6 percent in January, largely reflecting sharp increases in intracity mass transit fees and intercity bus fares. Automobile insurance costs continued to increase sharply, advancing 1.8 percent in January after registering a 1.1-percent rise in December. In the past 12 months, these costs have increased 12.4 percent. Used car prices, which registered small increases in each of the past 3 months, advanced 0.6 percent in January.

The index for apparel and upkeep declined 0.3 percent in January, after registering no change in December. A 0.5-percent decline in clothing prices, reflecting larger than usual seasonal price reductions, was only partially offset by a 0.9-percent rise in charges for apparel services.

The January increase of 0.4 percent in the medical care component follows a 0.7-percent rise in December. The index for medical care commodities—prescription drugs, nonprescription drugs, and medical supplies—rose 0.8 percent. The index for medical care services rose 0.4 percent, with the costs of professional services and hospital rooms up 0.1 and 0.7 percent, respectively.

The index for entertainment, which was unchanged in December, advanced 0.9 percent in January. This reflects a turnaround in the prices for all major entertainment commodity groups—reading materials, sporting goods and equipment, and toys, hobbies, and other entertainment commodities—coupled with a larger increase in charges for entertainment services.

The other goods and services components advanced 0. 9 percent in January, after increasing 0.6 percent in December, largely as a result of a 1.6-percent increase in prices for tobacco products.

CPI for Urban Wage Earners and Clerical Workers (CPI-W)—seasonally adjusted changes

On a seasonally adjusted basis, the CPI for Urban Wage Earners and Clerical Workers rose 0.3 percent in January, the same as in the CPI-U.

The Consumer Price Index Revision

The Bureau of Labor Statistics will begin publishing a revised Consumer Price Index (CPI) with the release of the January 1987 index in February 1987. As a result of the revision, both the CPI-U and the CPI-W will have updated expenditure weights based upon data tabulated from 3 years (1982, 1983, and 1984) of the Consumer Expenditure Survey, replacing the current expenditure weights based on 1972-73 data. The Bureau periodically revises the expenditure weights to reflect price changes of items currently being purchased by consumers.

The January 1987 CPI also will introduce a greatly enhanced housing survey, which will improve the rental equivalence measure of homeownership costs in both the CPI-U and CPI-W. The new housing sample was designed to represent optimally both owners and renters in the estimation of shelter costs.

A number of methodological and sampling advances first introduced in the 1978 revision also have been enhanced and will be incorporated into the CPI for January 1987. For example, the selection of the urban areas and the allocation of outlet samples in which prices are collected for the CPI were done by the Bureau with the primary objective of producing the most accurate national CPI possible with the funds available. The January 1987 index also will be based, for the first time, on the geographic distribution of consumers as of the 1980 Census of Population. The current CPI uses the 1970 Census of Population. The requirement to allocate the sample to provide the most accurate national CPI did result in some local areas not having samples sufficient to permit frequent publication. Therefore, beginning in January 1987, the Bureau will publish a number of local area CPI's less frequently. The areas affected by the changes in publication are identified below.

Both the CPI-U and the CPI-W published for January 1987 will be linked to the present series of each index as of December 1986 to provide a continuous series. The linking will be accomplished by setting the index levels of the revised CPI with the updated expenditure weights and samples equal to those published for the present series in December 1986. Each index will move upward or downward from the December 1986 level in accordance with subsequent changes in prices.

As in the past, the Bureau will publish selected indexes using the old expenditure weights for 6 months after the issuance of the revised CPI. Unlike earlier revisions, these overlap indexes will not be based on the old samples and will differ from the revised indexes only by their expenditure weights. The base period for the revised CPI issued for January 1987 will be 1967 = 100, the same as for the present index.

In addition to the national all-city average CPI-U and CPI-W indexes, the Bureau now publishes indexes for 28 local areas. In 1987, it will continue to publish indexes for all but one of these areas—Northeast Pennsylvania (Scranton-Wilkes-Barre). Because of the requirement to allocate the sample to provide the most accurate national CPI possible, 13 of the remaining 27 published areas will be published less frequently.

Beginning in 1987, the index for Detroit, currently published monthly, will be published only for the even-numbered months. Twelve areas now published bimonthly will be compiled on a semiannual average basis. These areas are: Buffalo-Niagara Falls, N.Y.; Cincinnati-Hamilton, Ohio-Ky.-Ind.; Kansas City, Mo.-Kansas City, Kan.; Milwaukee, Wis.; Minneapolis-St. Paul, Minn.-Wis.; Atlanta, Ga.; Anchorage, Alaska; Denver-Boulder, Colo.; Honolulu, Hawaii; Portland-Vancouver, Ore.-Wash.; San Diego, Calif.; and Seattle-Tacoma, Wash. These semiannual average indexes, which refer to the arithmetic averages of the 6-month periods from January through June and July through December, will be published with release of the CPI for July and January, respectively, i.e., in the months of August and February. These series will be compiled and published on their present reference bases, 1967 = 100 for all areas other than Anchorage, which is on an October 1967 reference base. Also, the Cleveland-Akron-Lorain, Ohio, indexes will be published for odd-numbered rather then even-numbered months.

Indexes also are currently published bimonthly for 4 regions, 5 size classes, and 16 region-by-size groups. Beginning with January 1987, publication will become monthly; two of the size classes will be combined; and two of the region-by-size groups will be eliminated.

West/D	2	12/77	174.5	-	176.2	-	-	-	-	3.8	1.0	-

[1] Foods, fuels, and several other items priced every month in all areas; most other goods and services priced as indicated:
M - Every month.
1 - January, March, May, July, September, and November.
2 - February, April, June, August, October, and December.

[2] Area is generally the Standard Metropolitan Statistical Area (SMSA), exclusive of farms. L.A.-Long Beach, Anaheim, Calif. is a combination of two SMSA's, and N.Y., N.Y.-Northeastern N.J. and Chicago, Ill.-Northwestern Ind. are the more extensive Standard Consolidated Areas. Area definitions are those established by the Office of Management and Budget in 1973, except for Denver-Boulder, Colo. which does not include Douglas County. Definitions do not include revisions made since 1973.

[3] Regions are defined as the four Census regions.
The population size classes are aggregations of areas which have urban population as defined:

A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2.

NOTE: Local area CPI indexes are by-products of the national CPI program. Because each local index is a small subset of the national index, it has a smaller sample size and is, therefore, subject to substantially more sampling and other measurement error than the national index. As a result, local area indexes show greater volatility than the national index, although their long-term trends are quite similar. Therefore, the Bureau of Labor Statistics strongly urges users to consider adopting the national average CPI for use in escalator clauses.

[1] Index is on an April 1967 = 100 base in Northeastern Pennsylvania and Portland, Oreg.-Wash.

[2] Area is generally the Standard Metropolitan Statistical Area (SMSA), exclusive of farms. L.A.-Long Beach, Anaheim, Calif. is a combination of two SMSA's, and N.Y., N.Y.-Northeastern N.J. and Chicago, Ill.-Northwestern Ind. are the more extensive Standard Consolidated Areas. Area definitions are those established by the Office of Management and Budget in 1973, except for Denver-Boulder, Colo. which does not include Douglas County. Definitions do not include revisions made since 1973.

[3] Regions are defined as the four Census regions.

The population size classes are aggregations of areas which have urban population as defined:

A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2.

[1] Areas on pricing schedule 2 (See footnote 1 table 13) will appear next month.

[2] Indexes on a October 1967=100 base unless otherwise indicated.

[3] Indexes are on a November 1977=100 base unless otherwise indicated.

[4] The 1957-59=100 base is not available for Anchorage, Alaska and Denver-Boulder, Colo.; index for Anchorage, Alaska is on a May-October 1960=100 base; index for Denver-Boulder, Colo. is on a January 1964=10C base.

[5] Indexes on a November 1982=100 base.

[6] Index on a June 1978=100 base in Miami, Fla.

[7] Indexes on a June 1978=100 base in Cincinnati, Ohio-Ky.-Ind. and Miami, Fla. Index on a January 1978=100 base in Denver-Boulder, Col.

[8] Indexes on a June 1978=100 base.

[9] Indexes on a June 1978=100 base in Anchorage, Alaska; Denver-Boulder, Col.; and Miami, Fla.

[10] Indexes on a June 1978=100 base in Anchorage, Alaska; Denver-Boulder, Col.; and Miami, Fla. Indexes on a January 1976=100 base in Baltimore, Md.; Boston, Mass.; Cincinnati, Ohio-Ky.-Ind.; and Milwaukee, Wis.

[11] Indexes on an August 1981=100 base.

[12] Indexes are on the bases listed below:

Anchorage, Alaska.....January 1978=100.
Baltimore, Md.....March 1978=100.
Boston, Mass.....January 1978=100.
Cincinnati, Ohio-Ky.-Ind.....March 1978=100.
Denver-Boulder, Colo.....January 1978=100.
Miami, Fla.....November 1977=100.
Milwaukee, Wis.....November 1977=100.
Northeastern Pennsylvania...November 1977=100.
Portland, Oreg.-Wash.....January 1978=100.
St. Louis, Mo.-Ill.....March 1978=100.
San Diego, Calif.....November 1977=100.
Seattle-Everett, Wash.....November 1977=100.
Washington, D.C.-Md.-Va.....November 1977=100.

[13] The 1957-59=100 base is not available for San Diego, Calif.; index is on a February 1965=100 base.

[14] Index is on an April 1967=100 base in Northeastern Pennsylvania and Portland, Oreg.-Wash.

[15] Revised index for St. Louis, Mo. - Ill.: Oct. 1985=409.3

[16] Index on a June 1978=100 base in San Diego, Calif.

[17] Revised index for St. Louis, Mo. - Ill.: Oct. 1985=376.8

[18] Indexes on a June 1978=100 base in Northeast, Pa.; and Portland, Oreg.-Wash.

[19] Revised index for St. Louis, Mo. - Ill.: Oct. 1985=288.8

[20] Indexes on a June 1978=100 base in Northeast, Pa.; and Portland, Oreg.-Wash. Indexes on a January 1976=100 base' in St Louis, Mo.-Ill.; San Diego, Calif.; Seattle-Everett, Wash.; and Washington, D.C.-Md.-Va.

[21] Revised index for St. Louis, Mo. - Ill.: Oct. 1985=172.9

West/D	2	12/77	176.0	-	177.7	-	-	-	-	3.6	1.0	-

[1] Foods, fuels, and several other items priced every month in all areas; most other goods and services priced as indicated:
M - Every month.
1 - January, March, May, July, September, and November.
2 - February, April, June, August, October, and December.

[2] Area is generally the Standard Metropolitan Statistical Area (SMSA), exclusive of farms. L.A.-Long Beach, Anaheim, Calif. is a combination of two SMSA's, and N.Y., N.Y.-Northeastern N.J. and Chicago, Ill.-Northwestern Ind. are the more extensive Standard Consolidated Areas. Area definitions are those established by the Office of Management and Budget in 1973, except for Denver-Boulder, Colo. which does not include Douglas County. Definitions do not include revisions made since 1973.

[3] Regions are defined as the four Census regions.

The population size classes are aggregations of areas which have urban population as defined:

A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2.

NOTE: Local area CPI indexes are by-products of the national CPI program. Because each local index is a small subset of the national index, it has a smaller sample size and is, therefore, subject to substantially more sampling and other measurement error than the national index. As a result, local area indexes show greater volatility than the national index, although their long-term trends are quite similar. Therefore, the Bureau of Labor Statistics strongly urges users to consider adopting the national average CPI for use in escalator clauses.

[1] Index is on an April 1967=100 base in Northeastern Pennsylvania and Portland, Oreg.-Wash.

[2] Area is generally the Standard Metropolitan Statistical Area (SMSA), exclusive of farms. L.A.-Long Beach, Anahnim, Calif. is a combination of two SMSA's, and N.Y., N.Y.-Northeastern N.J. and Chicago, Ill.-Northwestern Ind. are the more extensive Standard Consolidated Areas. Area definitions are those established by the Office of Management and Budget in 1973, except for Denver-Boulder, Colo. which does not include Douglas County. Definitions do not include revisions made since 1973.

[3] Regions are defined as the four Consus regions.

The population size classes are aggregations of areas which have urban population as defined:

A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2.

[1] Area is generally the Standard Metropolitan Statistical Area (SMSA), exclusive of farms. L.A.-Long Beach, Anaheim, Calif. is a combination of two SMSA's, and N.Y., N.Y.-Northeastern N.J. and Chicago, Ill.-Northwestern Ind. are the more extensive Standard Consolidated Areas. Area definitions are those established by the Office of Management and Budget in 1973, except for Denver-Boulder, Colo. which does not include Douglas County. Definitions do not include revisions made since 1973.

[2] Honolulu not included for utility (piped) gas.

[3] October 1985 data revised. Average price per 500 KWH is $35.293.

[4] Prices are for synthetic natural gas and propane only.

[5] Regions are defined as the four Census regions.

The population size classes are aggregations of areas which have urban population as defined below:

A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2.

[6] October 1985 data revised. Average price per 500 KWH is $39.221.

[7] October 1985 data revised. Average price per 500 KWH is $41.434.

NA Data not adequate for publication.

Table P2. Average residential unit prices and consumption ranges for utility (piped) gas and electricity for U.S. city average and selected areas

Area, region and population size class	Average price per therm of utility (piped) gas		Range of therm consumption for Jan. 1986		Average price per KWH of electricity		Range of KWH consumption for Jan. 1986

[1] Also includes types of gasoline not shown separately.

[2] Unleaded premium replaced leaded premium in January 1984.

[3] Area is generally the Standard Metropolitan Statistical Area (SMSA), exclusive of farms. L.A.-Long Beach, Anaheim, Calif. is a combination of two SMSA's, and N.Y., N.Y.-Northeastern N.J. and Chicago, Ill.-Northwestern Ind. are the more extensive Standard Consolidated Areas. Area definitions are those established by the Office of Management and Budget in 1973, except for Denver-Boulder, Colo. which does not include Douglas County. Definitions do not include revisions made since 1973.

[4] Regions are defined as the four Census regions.

The population size classes are aggregations of areas which have urban population as defined below:

A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2.

Nondurables less food and apparel	175.1	2.5	177.5	2.1	181.4	2.5	179.2	2.3	178.0	1.8
Nondurables	157.5	2.7	161.2	2.3	162.4	2.3	160.4	2.1	161.8	1.9
Services less rent of shelter [2]	115.0	4.9	113.4	4.5	112.6	4.6	113.2	4.9	112.3	4.0
Services less medical care	187.5	5.4	193.3	5.1	190.7	5.0	188.4	4.8	188.3	4.0
Energy [3]	192.9	1.1	196.1	.4	194.8	.6	196.3	1.1	182.2	-.2
All items less energy	168.6	4.4	173.4	4.0	172.1	4.0	169.3	3.7	170.4	3.3
All items less food and energy	171.7	4.8	177.1	4.4	175.5	4.4	172.8	4.2	173.0	3.7
Commodities less food and energy	152.8	2.6	160.6	2.5	161.0	2.7	158.9	2.7	156.3	2.6
Energy commodities	200.5	.3	200.6	.1	199.3	.1	197.4	-.1	191.3	-.8
Services less energy	186.3	6.0	191.9	5.6	189.3	5.5	187.1	5.2	190.1	4.5

[1] The population size classes are aggregations of areas which have urban population as defined below:

A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2.

[2] Indexes on a December 1982=100 base.

[3] Indexes on a June 1978=100 base.

Table 25A. Consumer Price Index for All Urban Consumers: Cross classification of region and population size class[1], by expenditure category and commodity and service group, Annual averages, 1985, and percent changes, 1984 to 1985

[1] Regions are defined as the four Census regions.
The population size classes are aggregations of areas which have urban population as defined below:
A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.
Population size class A is the aggregation of population size classes A-1 and A-2.

[2] Indexes on a December 1982=100 base.

[3] Indexes on a June 1978=100 base.

[4] Indexes on an August 1981=100 base.

Services less energy	182.6	6.0	187.6	4.6	184.8	5.7	186.9	7.0	193.8	6.2

[1] The population size classes are aggregations of areas which have urban population as defined below:

A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2.

[2] Indexes on a December 1984=100 base.

[3] Indexes on a June 1978=100 base.

[1] Regions are defined as the four Census regions.
The population size classes are aggregations of areas which have urban population as defined below:
A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.
Population size class A is the aggregation of population size classes A-1 and A-2.
[2] Indexes on a December 1984=100 base.
[3] Indexes on a June 1978=100 base.
[4] Indexes on an August 1981=100 base.
[NA] Data not adequate for publication.

Technical Notes

Brief Explanation of the CPI

The Consumer Price Index (CPI) is a measure of the average change in prices over time in a fixed market basket of goods and services. The Bureau of Labor Statistics publishes CPI's for two population groups: (1) a CPI for All Urban Consumers (CPI-U) which covers approximately 80 percent of the total noninstitutional civilian population; and (2) a CPI for Urban Wage Earners and Clerical Workers (CPI-W) which represents about half the population covered by the CPI-U. The CPI-U includes, in addition to wage earners and clerical workers, groups such as professional, managerial, and technical workers, the self-employed, short-term workers, the unemployed, and retirees and others not in the labor force.

The CPI is based on prices of food, clothing, shelter, and fuels, transportation fares, charges for doctors' and dentists' services, drugs, and the other goods and services that people buy for day-to-day living. Prices are collected in 85 urban areas across the country from about 4,000 food stores, 24,000 rental units, and 28,000 establishments—department stores, hospitals, filling stations, and other types of stores and service establishments. All taxes directly associated with the purchase and use of items are included in the index. Prices of food, fuels, and a few other items are obtained every month in all 85 locations. Prices of most other commodities and services are collected every month in the five largest geographic areas and every other month in other areas. Prices of most goods and services are obtained by personal visits of the Bureau's trained representatives. Mail questionnaires are used to obtain public utility rates, some fuel prices, and certain other items.

In calculating the index, price changes for the various items in each location are averaged together with weights which represent their importance in the spending of the appropriate population group. Local data are then combined to obtain a U.S. city average. Separate indexes are also published by size of city, by region of the country, for cross-classifications of regions and population-size classes, and for 28 local areas. Area indexes do not measure differences in the level of prices among cities, they only measure the average change in prices for each area since the base period.

The index measures price changes from a designated reference date—1967—which equals 100.0. An increase of 203 percent, for example, is shown as 303.0. This change can also be expressed in dollars as follows: The price of a base period "market basket" of goods and services in the CPI has risen from $10 in 1967 to $30.30.

For further details see *BLS Handbook of Methods*, Vol. II, "The Consumer Price Index," Bulletin 2134-2, April 1984.

Calculating Index Changes

Movements of the indexes from one month to another are usually expressed as percent changes rather than changes in index points, because index point changes are affected by the level of the index in relation to its base period while percent changes are not. The example in the accompanying box illustrates the computation of index point and percent changes.

Percent changes for 3-month and 6-month periods are expressed as annual rates and are computed according to the standard formula for compound growth rates. These data indicate what the percent change would be if the current rate were maintained for a 12-month period.

Index Point Change	
CPI	315.5
Less previous index	303.5
Equals index point change	12.0
Percent Change	
Index point difference	12.0
Divided by the previous index	303.5
Equals	0.040
Results multiplied by one hundred	0.040 x 100
Equals percent change	4.0

Homeownership Changes

The Consumer Price Index (CPI) has been changed to incorporate a rental equivalence measure of homeowners' costs in accordance with plans announced by the Bureau of Labor Statistics (BLS) on October 27, 1981. For the CPI for All Urban Consumers (CPI-U), this change was effective with release of the index for January 1983 and for the CPI for Urban Wage Earners and Clerical Workers (CPI-W), it was effective with the release of the January 1985 index. The rental equivalence approach calculates shelter costs of homeowners based on the implicit rent owners would have to pay to rent homes that they own. The old method calculated homeownership as home purchase, mortgage interest costs, property taxes, property insurance, and maintenance and repairs. The new homeownership component was introduced into both the CPI-U and the CPI-W in such a manner that in each case the indexes using the old and new methodologies were equal in the so-called "link month"—December 1982 for the CPI-U and December 1984 for the CPI-W. For more information, see the *CPI Detailed Report* for January 1983, pp. 7-13.

Changes in Frequency of Publication for Local Area CPI's

The Bureau of Labor Statistics will improve the sample of urban areas in which it gathers prices for monthly preparation of the Consumer Price Index beginning in 1987. At the same time, the Bureau will publish a number of local area CPI's less frequently.

The changes in publication frequency arise from the requirement to allocate the sample to reflect population shifts in the 1980 census so as to provide the most accurate national CPI possible with the funds available. As a result, some local areas will no longer have samples sufficient to permit more frequent publication.

In addition to the national index for all cities, the Bureau now publishes indexes for 28 urban areas. In 1987, it will continue to publish indexes for all but one of these areas—Northeast Pennsylvania (Scranton—Wilkes-Barre).

Of the remaining 27 published urban areas, 13 will have a reduction in frequency beginning in 1987. The index for Detroit, currently published monthly, will be published only in the even numbered months. Twelve areas now published bimonthly will be compiled on a semiannual average basis. These areas are: Buffalo-Niagara Falls, NY; Cincinnati-Hamilton, OH-KY-IN; Kansas City, MO-Kansas City, KS; Milwaukee, WI; Minneapolis-St. Paul, MN-WI; Atlanta, GA; Anchorage, AK; Denver-Boulder, CO; Honolulu, HI; Portland-Vancouver, OR-WA; San Diego, CA; and Seattle-Tacoma, WA. These semi-annual average indexes, which refer to the arithmetic averages of the 6-month periods from January through June and July through December, will be published with release of the CPI for July and January, respectively, i.e., in the months of August and February. These series will be compiled and published on their present reference bases, 1967 = 100 for all areas other than Anchorage, which is on an October 1967 reference base. Also, the Cleveland-Akron-Lorain, OH, indexes will be published in odd-numbered rather then even-numbered months.

Further details are available from BLS.

Energy Prices

Prices are usually available for the U.S. city average, 28 large urban areas, and 16 areas reflecting the four Census regions cross-classified by four population sizes. However, not all energy commodities and services are used in every area of the country. Fuel oil, for example, is not a common heating fuel in some urban areas, particularly in the South and West. Where no average prices are available, the designation NA will appear. NA will also appear if the data sufficiency criteria have not been met in any given month. For example, if there are fewer than five usable fuel oil prices for a published city or region size class, no fuel oil prices for the area will be published.

All prices, except for electricity, are collected monthly by BLS representatives in the urban areas priced for the CPI. Electricity prices are collected monthly on mail questionnaires by the Department of Energy for BLS. Prices for natural gas and electricity include fuel and purchased gas adjustments and all applicable taxes. Fuel oil and gasoline prices include applicable Federal, State, and local taxes.

Natural gas and electricity. Natural gas prices are reported in therms, which are a measure of heating value. Electricity prices are given in kilowatt hours (kwh). For both utility services, the consumption ranges specified in table P-2 are the upper and lower limits of the bill sizes priced for the Consumer Price Index. The average prices per therm and per kilowatt hour are calculated from bills priced within these ranges. It should be noted that bills priced for the CPI are not only for different consumption amounts, but may also be calculated from different types of residential rate schedules. *The average prices per therm and per kilowatt hour are not, therefore, generally suitable for use in place-to-place price comparisons.*

The average prices for 40 and 100 therms of natural gas and for 500 kilowatt hours of electricity (table P-1) are calculated from a special price collection program. They are not used in the calculation of the CPI. Since

heating and air-conditioning requirements vary by geographic location, climate, and weather conditions, it cannot be inferred that these consumption amounts represent those used by a typical residential consumer. These bills are used merely to track price changes over time for constant amounts of consumption, to provide data for place-to-place price comparisons, and to provide continuity with prices of natural gas and electricity formerly published in conjunction with the unrevised Consumer Price Index.

Fuel oil. Only #2 fuel oil (home heating oil) is priced. Prices are collected, in most cases, for quantities greater than one gallon. These prices are converted to a per gallon price for this program. Fuel oil prices reflect discounts for quantity and/or quick payment.

Gasoline. Gasoline prices are collected at the pump from a sample of full service, mini-service, and self-serve gas stations.

Approximate British Thermal Unit (BTU) values for some energy items are as follows, according to the source indicated:

1 therm = 100,000 BTU'S (U.S. Department of Energy).
1 kwh = 3,412 BTU'S (Edison Electric Institute)
1 gallon #2 fuel oil = 140,000 BTU'S (U.S. Department of Energy).

Food Prices

In the revised CPI, actual weighted average prices are calculated each month at the national level and for the four Census geographic regions. As a result of changes in price collection methodology and sample sizes, average prices for individual cities cannot in general be produced. It is hoped, however, that regional average prices will help satisfy the need for local area data. It should be noted, however, that the average food prices in this report reflect variations in brand, quality, and size among geographic areas. Users of average food prices should be aware that these differences exist.

Because a number of food commodities are not available in all areas on a year-round basis, prices will not appear in some months for some regions or for the U.S. city average. In other instances, sufficient prices may not be available due to temporary disruptions in supplies. Where no average prices are available, the designation NA will appear. When a price is not available from an individual store in any month, an estimated price will be calculated for the missing item and used in computing the average price. In cases where the proportion of estimated prices used to calculate the average is considered too high, the average price will not be published and NA will appear for that item in the table.

Because of space limitations in the table, the description for each item is abbreviated. More detailed specifications are available from BLS Regional Offices or from the Washington Office upon request.

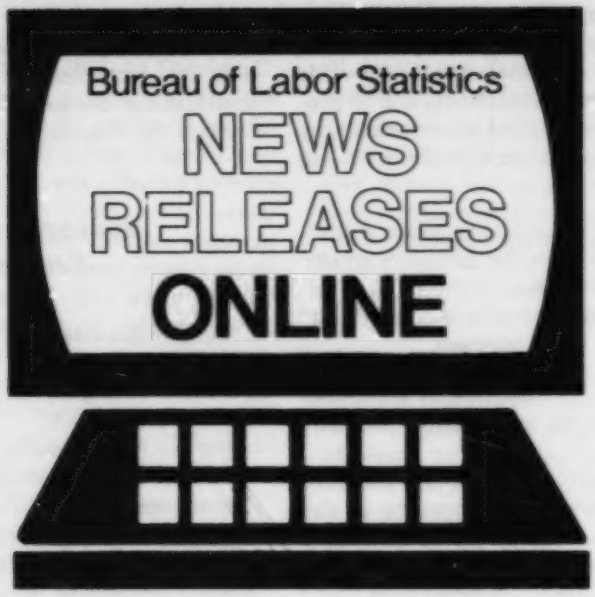
Seasonally Adjusted and Unadjusted Data

Because price data are used for different purposes by different groups, the Bureau of Labor Statistics publishes seasonally adjusted as well as unadjusted changes each month.

For analyzing general price trends in the economy, seasonally adjusted changes are usually preferred since they eliminate the effect of changes that normally occur at the same time and in about the same magnitude every year—such as price movements resulting from changing climatic conditions, production cycles, model changeovers, holidays, and sales.

The unadjusted data are of primary interest to consumers concerned about the prices they actually pay. Unadjusted data also are used extensively for escalation purposes. Many collective bargaining contract agreements and pension plans, for example, tie compensation changes to the Consumer Price Index unadjusted for seasonal variation.

Seasonal factors used in computing the seasonally adjusted indexes are derived by the X-11 Seasonal Adjustment Method. The updated seasonal data at the end of 1977 replaced data from 1967 through 1977. Subsequent annual updates have replaced 5 years of seasonal data, e.g., data from 1981 through 1985 were replaced at the end of 1985. The seasonal movement of all items and 44 other aggregations is derived by combining the seasonal movement of 51 selected components. Each year the seasonal status of every series is reevaluated based upon certain statistical criteria. If any of the 51 components change their seasonal adjustment status from seasonally adjusted to not seasonally adjusted, not seasonally adjusted data will be used for the last 5 years, but the seasonally adjusted indexes will be used before that period. If any of the 51 components change their status from not seasonally adjusted to seasonally adjusted, seasonally adjusted data will be used for the last 5 years, but not seasonally adjusted indexes will be used before that period.



Economic indicators from the Bureau of Labor Statistics are available electronically at the time of their release.

BLS makes its news releases availabe online through a commercial contractor. There is no charge for the data. Users pay only for the actual computer time used, at a rate of about $7.50 per hour for local access and about $20 per hour anywhere in the country.

More than 100 releases a year are available online, including monthly releases on consumer and producer prices, earnings, and employment and unemployment, and quarterly releases on productivity, employment costs, collective bargaining, and import and export price indexes.

Users may access part or all of a release, paying only for actual computer time used. There are no minimum or contracting fees.

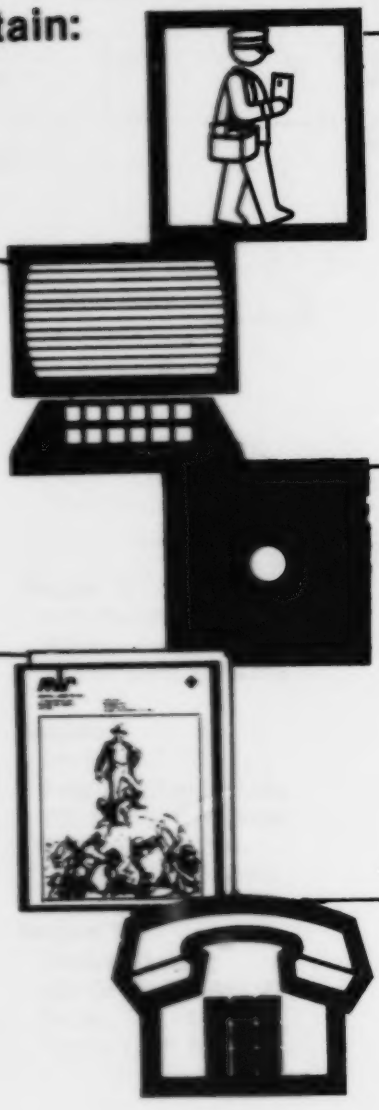
BLS International Price Data

Quarterly measures of price change for U.S. imports and exports under various classifications, useful for different types of analysis:

- SITC, a United Nations classification for international comparisons;
- SIC-based, used for industry comparisons;
- End use, for use with National Accounts data.

How to obtain:



Mailing List:

To obtain the quarterly news release, ask to be put on a mailing list. Call Bureau of Labor Statistics, Division of International Prices (202) 272-5020.

Electronic News Release:

Quickest. Accessible electronically immediately at release time through BLS news release service. Write to the Office of Publications, Bureau of Labor Statistics, Washington D.C. 20212, or call (202) 523-1913.

Data Diskettes:

Quarterly import and export price indexes are available on diskettes for the most recent eight quarters. For information, call the Office of Publications, Bureau of Labor Statistics (202) 523-1090.

Monthly Labor Review:

Articles twice a year provide in-depth analyses of import and export price movements and developments in U.S. trade. Subscription available from Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402, for $24 a year; $4 single copy.

Telephone:

For comparisons of United States, German, and Japanese export price indexes at the detailed product level, call Division of International Prices (202) 272-5027.

OFFICE OF PRICES AND LIVING CONDITIONS
Kenneth V. Dalton, *Associate Commissioner*

The CPI Detailed Report is a monthly report on consumer price movements, including statistical tables and technical notes. The report covers two indexes, the Consumer Price Index for All Urban Consumers (CPI-U) and the Consumer Price Index for Wage Earners and Clerical Workers (CPI-W). The indexes reflect data for the U.S. city average and selected areas.

This publication may be ordered from the Superintendent of Documents, U.S. Government Printing Office, Washington D.C. 20402. Subscription price per year $25 domestic, and $31.25 foreign. Single copy domestic, $4; foreign, $5. Send correspondence on circulation and subscription matters (including address changes) to the Superintendent of Documents.

CPI MAILGRAM provides selected U.S. City Average data for CPI-U and CPI-W within 24 hours of release. Order from: National Technical Information Service, 5285 Port Royal Road, Springfield, Virginia 22161. Subscription rates: $125 in contiguous U.S. and Hawaii; $135 in Alaska and Canada.

Material in this publication is in the public domain and may be reproduced without permission of the Federal Government. Please credit the Bureau of Labor Statistics. Second-class postage paid at Washington, D.C., and at additional mailing offices.

May	June 20	August	September 23

NOTE: The Bureau of Labor Statistics currently is completing a major revision of the Consumer Price Index. Beginning with release of the CPI for January 1987 on February 27, 1987, the Bureau will introduce revised versions of the current CPI's both for All Urban Consumers and for Urban Wage Earners and Clerical Workers. The revised CPI's will reflect more current population and spending patterns and numerous technical enhancements. See page 3 for further details.

Price Movements
February 1986

The Consumer Price Index for All Urban Consumers (CPI-U) declined 0.3 percent before seasonal adjustment in February to a level of 327.5 (1967 = 100). For the 12-month period ended in February, the CPI-U increased 3.2 percent.

The Consumer Price Index for Urban Wage Earners and Clerical Workers (CPI-W) declined 0.3 percent in February prior to seasonal adjustment. The February 1986 CPI-W level of 323.2 (1967 = 100) was 3.0 percent higher than the index in February 1985.

CPI for All Urban Consumers (CPI-U)—seasonally adjusted changes

On a seasonally adjusted basis, the CPI-U declined 0.4 percent in February, after registering a 0.3-percent increase in January. The February decline represents the first decrease since December 1982 and the largest drop since a 0.4-percent decline in November 1953. Declines in energy and food prices were principally responsible for the downturn in the February CPI. Prices for energy commodities—fuel oil, coal, bottled gas, and motor fuels—dropped 6.8 percent in February, primarily reflecting the recent drop in crude oil prices. The grocery store food index decreased 1.0 percent, largely as a result of declines in prices for fresh fruits and vegetables and for meats. Excluding food and energy, the CPI rose 0.2 percent in February, somewhat less than in recent months. The slowdown among items other than food and energy has occurred primarily in the prices for goods, with commodities other than food and energy declining 0.1 percent in February, compared with an average monthly increase of 0.3 percent in the preceding 4 months. Services excluding energy rose 0.4 percent in February.

The transportation component, reflecting a sharp drop in prices for motor fuels, declined 1.4 percent in February, after advancing 0.5 percent in January. Gasoline prices declined 5.9 percent in February, receding to their level just prior to the April 1, 1983, increase in the Federal excise tax, and are now 16.6 percent below their peak level of March 1981. Used car prices—down 0.4 percent—also contributed to the February decline in the transportation component. During the 12-month period ended in February, the used car index has declined 3.6 percent. On the other hand, new car prices rose 0.4 percent in February and have increased 3.0 percent in the past 12 months. Automobile insurance costs continued to advance, increasing 0.9 percent in February. In the past 12 months, these costs have advanced 13.0 percent. The index for public transportation rose 0.6 percent as another sharp increase in intracity mass transit fees was partially offset by declines in fares for airlines and trains.

The food and beverage component registered a decline of 0.6 percent in February, following an increase of 0.3 percent in January. Grocery store food prices decreased 1.0 percent, reflecting a sharp turnaround in fruit and vegetable prices and the second drop in a row

Table A. Percent changes in the CPI for All Urban Consumers (CPI-U)[1]

Expenditure category	Seasonally adjusted								Unadjusted
	Changes from preceding month							Compound annual rate 3-months ended February 1986	12-months ended February 1986

for the index for meats, poultry, fish, and eggs. The February decline of 13.1 percent in fresh fruit and vegetable prices brought their level to 6.4 percent below that of a year ago. February declines in beef and pork prices—down 1.8 and 1.2 percent, respectively—also brought their prices below their year earlier levels. Poultry prices increased 0.1 percent, but remained slightly less than in February 1985. Among other categories of grocery store foods, the index for other foods at home rose 2.2 percent, principally reflecting a sharp increase in coffee prices. The indexes for roasted coffee and for freeze dried and instant coffee rose 26.7 and 15.1 percent, respectively. The indexes for cereal and bakery products and dairy products rose only slightly for the second consecutive month. Restaurant meals rose 0.1 percent and alcoholic beverages declined 0.1 percent.

The housing component declined 0.1 percent in February, following an increase of 0.3 percent in January. A record drop in fuel oil prices and a small decrease in the index for household furnishings and operations were only partially offset by small-to-moderate increases in most other housing components. Fuel oil prices—down 11.5 percent in February—are now 21.9 percent below their peak level of April 1981. Among other fuels, charges for electricity and gas rose 0.6 and 0.7 percent, respectively. The shelter component rose 0.4 percent in February, the same as in each of the preceding 2 months. These recent increases for shelter compare with an average monthly rate of increase of 0.5 percent in 1985. Within shelter, renters' costs and homeowners' costs both increased 0.3 percent in February.

The index for apparel and upkeep—down 0.5 percent in February—declined for the second consecutive month. Clothing prices, reflecting the continuation of larger than usual seasonal price reductions, declined 0.6 percent. Charges for apparel services were unchanged.

The February increase of 0.7 percent in the medical care component follows a 0.4-percent rise in January. The index for medical care commodities—prescription drugs, nonprescription drugs, and medical supplies—rose 0.9 percent. The index for medical care services rose 0.6 percent, with the costs of professional services and hospital rooms up 0.5 and 0.4 percent, respectively.

The index for entertainment rose 0.2 percent in February, following a 0.9-percent increase in January. Declines in prices for entertainment commodities partially offset the second consecutive large increase in the index for entertainment services.

The other goods and services component advanced 0.6 percent in February, after increasing 0.9 percent in January. A smaller increase in prices for tobacco products—up 0.6 percent in February, following a 1.6-percent rise in January—was responsible for the moderation.

CPI for Urban Wage Earners and Clerical Workers (CPI-W)—seasonally adjusted changes

On a seasonally adjusted basis, the CPI for Urban Wage Earners and Clerical Workers declined 0.5 percent in February.

West/D	2	12/77	-	176.2	-	174.8	2.8	-.8	-	-	-	-

[1] Foods, fuels, and several other items priced every month in all areas; most other goods and services priced as indicated:
M - Every month.
1 - January, March, May, July, September, and November.
2 - February, April, June, August, October, and December.

[2] Area is generally the Standard Metropolitan Statistical Area (SMSA), exclusive of farms. L.A.-Long Beach, Anaheim, Calif. is a combination of two SMSA's, and N.Y., N.Y.-Northeastern N.J. and Chicago, Ill.-Northwestern Ind. are the more extensive Standard Consolidated Areas. Area definitions are those established by the Office of Management and Budget in 1973, except for Denver-Boulder, Colo. which does not include Douglas County. Definitions do not include revisions made since 1973.

[3] Regions are defined as the four Census regions.

The population size classes are aggregations of areas which have urban population as defined:

A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2.

NOTE: Local area CPI indexes are by-products of the national CPI program. Because each local index is a small subset of the national index, it has a smaller sample size and is, therefore, subject to substantially more sampling and other measurement error than the national index. As a result, local area indexes show greater volatility than the national index, although their long-term trends are quite similar. Therefore, the Bureau of Labor Statistics strongly urges users to consider adopting the national average CPI for use in escalator clauses.

West/D	-.8	.0	.4	-.3	-8.0	2.2

[1] Index is on an April 1967=100 base in Northeastern Pennsylvania and Portland, Oreg.-Wash.

[2] Area is generally the Standard Metropolitan Statistical Area (SMSA), exclusive of farms. L.A.-Long Beach, Anaheim, Calif. is a combination of two SMSA's, and N.Y., N.Y.-Northeastern N.J. and Chicago, Ill.-Northwestern Ind. are the more extensive Standard Consolidated Areas. Area definitions are those established by the Office of Management and Budget in 1973, except for Denver-Boulder, Colo. which does not include Douglas County. Definitions do not include revisions made since 1973.

[3] Regions are defined as the four Census regions.

The population size classes are aggregations of areas which have urban population as defined:

A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2.

[1] Areas on pricing schedule 1 (See footnote 1, Table 13) will appear next month.

[2] For the following areas the 1957-59=100 base is not available; indexes are on the bases listed below:

Buffalo, N. Y.	November 1963=100.
Dallas-Fort Worth, Tex.	November 1963=100.
Honolulu, Hawaii	December 1963=100.

[3] Indexes on a December 1982=100 base.

[4] Indexes on a June 1978=100 base, except in Buffalo, N.Y. where 1967=100.

[5] Indexes on a June 1978=100 base.

[6] Indexes on a January 1976=100 base.

[7] Indexes on an August 1981=100 base.

[8] Indexes are on the bases listed below:

Atlanta, Ga.	December 1977=100.
Buffalo, N. Y.	February 1978=100.
Cleveland, Ohio	February 1978=100.
Dallas-Fort Worth, Tex.	February 1978=100.
Honolulu, Hawaii	December 1977=100.
Houston, Tex.	April 1978=100.
Kansas City, Mo.-Kans.	December 1977=100.
Minneapolis-St. Paul, Minn.-Wis.	April 1978=100.
Pittsburgh, Pa.	April 1978=100.
San Francisco-Oakland, Calif.	December 1977=100.

[9] Indexes on a June 1978=100 base, except in Minneapolis-St. Paul, Minn.-Wis. where 1967=100.

[NA] Data not adequate for publication.

West/D	2	12/77	-	177.7	-	176.3	2.8	-.8	-	-	-	-

[1] Foods, fuels, and several other items priced every month in all areas; most other goods and services priced as indicated:
M - Every month.
1 - January, March, May, July, September, and November.
2 - February, April, June, August, October, and December.

[2] Area is generally the Standard Metropolitan Statistical Area (SMSA), exclusive of farms. L.A.-Long Beach, Anaheim, Calif. is a combination of two SMSA's, and N.Y., N.Y.-Northeastern N.J. and Chicago, Ill.-Northwestern Ind. are the more extensive Standard Consolidated Areas. Area definitions are those established by the Office of Management and Budget in 1973, except for Denver-Boulder, Colo. which does not include Douglas County. Definitions do not include revisions made since 1973.

[3] Regions are defined as the four Census regions.
The population size classes are aggregations of areas which have urban population as defined:
A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.
Population size class A is the aggregation of population size classes A-1 and A-2.

NOTE: Local area CPI indexes are by-products of the national CPI program. Because each local index is a small subset of the national index, it has a smaller sample size and is, therefore, subject to substantially more sampling and other measurement error than the national index. As a result, local area indexes show greater volatility than the national index, although their long-term trends are quite similar. Therefore, the Bureau of Labor Statistics strongly urges users to consider adopting the national average CPI for use in escalator clauses.

West/D	-.6	.0	.2	-.3	-7.4	2.2

[1] Index is on an April 1967=100 base in Northeastern Pennsylvania and Portland, Oreg.-Wash.

[2] Area is generally the Standard Metropolitan Statistical Area (SMSA), exclusive of farms. L.A.-Long Beach, Anaheim, Calif. is a combination of two SMSA's, and N.Y., N.Y.-Northeastern N.J. and Chicago, Ill.-Northwestern Ind. are the more extensive Standard Consolidated Areas. Area definitions are those established by the Office of Management and Budget in 1973, except for Denver-Boulder, Colo. which does not include Douglas County. Definitions do not include revisions made since 1973.

[3] Regions are defined as the four Census regions.

The population size classes are aggregations of areas which have urban population as defined:

A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2.

[1] Areas on pricing schedule 1 (See footnote 1, Table 18) will appear next month.

[2] For the following areas the 1957-59 = 100 base is not available; indexes are on the bases listed below:

Buffalo, N. Y.....November 1963 = 100.
Dallas-Fort Worth, Tex.....November 1963 = 100.
Honolulu, Hawaii.....December 1963 = 100.

[3] Indexes on a December 1984 = 100 base.

[4] Indexes on a June 1978 = 100 base, except in Buffalo, N.Y. where 1967 = 100.

[5] Indexes on a June 1978 = 100 base.

[6] Indexes on a January 1976 = 100 base.

[7] Indexes on an August 1981 = 100 base.

[8] Indexes are on the bases listed below:

Atlanta, Ga.....December 1977 = 100.
Buffalo, N. Y.....February 1978 = 100.
Cleveland, Ohio.....February 1978 = 100.
Dallas-Fort Worth, Tex.....February 1978 = 100.
Honolulu, Hawaii.....December 1977 = 100.
Houston, Tex.....April 1978 = 100.
Kansas City, Mo.-Kans.....December 1977 = 100.
Minneapolis-St. Paul, Minn.-Wis..April 1978 = 100.
Pittsburgh, Pa.....April 1978 = 100.
San Francisco-Oakland, Calif.....December 1977 = 100.

[9] Indexes on a June 1978 = 100 base, except in Minneapolis-St. Paul, Minn.-Wis. where 1967 = 100.

[NA] Data not adequate for publication.

[1] Regions are defined as the four Census regions.
The population size classes are aggregations of areas which have urban population as defined:
A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.
Population size class A is the aggregation of population size classes A-1 and A-2.

[2] Indexes on a December 1982=100 base.

[3] Indexes on a June 1976=100 base.

[4] Indexes on an August 1981=100 base.

[1] The population size classes are aggregations of areas which have urban population as defined:

A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2.

[2] Indexes on a December 1982 = 100 base.

[3] Indexes on a June 1978 = 100 base.

[1] The population size classes are aggregations of areas which have urban population as defined:

A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2.

[2] Indexes on a December 1982=100 base.
[3] Indexes on a June 1978=100 base.
[4] Indexes on an August 1981=100 base.
NA Data not adequate for publication.

[1] Regions are defined as the four Census regions.
The population size classes are aggregations of areas which have urban population as defined:
A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.
Population size class A is the aggregation of population size classes A-1 and A-2.

[2] Indexes on a December 1984 = 100 base.

[3] Indexes on a June 1978 = 100 base.

[4] Indexes on an August 1981 = 100 base.

[1] The population size classes are aggregations of areas which have urban population as defined:

A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2.

[2] Indexes on a December 1984=100 base.

[3] Indexes on a June 1978=100 base.

[1] The population size classes are aggregations of areas which have urban population as defined:

A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2.

[2] Indexes on a December 1984=100 base.
[3] Indexes on a June 1978=100 base.
[4] Indexes on an August 1981=100 base.
[NA] Data not adequate for publication.

[1] Area is generally the Standard Metropolitan Statistical Area (SMSA), exclusive of farms. L.A.-Long Beach, Anaheim, Calif. is a combination of two SMSA's, and N.Y., N.Y.-Northeastern N.J. and Chicago, Ill.-Northwestern Ind. are the more extensive Standard Consolidated Areas. Area definitions are those established by the Office of Management and Budget in 1973, except for Denver-Boulder, Colo. which does not include Douglas County. Definitions do not include revisions made since 1973.

[2] Honolulu not included for utility (piped) gas.

[3] Prices are for synthetic natural gas and propane only.

[4] Regions are defined as the four Census regions.

The population size classes are aggregations of areas which have urban population as defined below:

A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2.

[NA] Data not adequate for publication.

Table P2. Average residential unit prices and consumption ranges for utility (piped) gas and electricity for U.S. city average and selected areas

[1] Also includes types of gasoline not shown separately.

[2] Unleaded premium replaced leaded premium in January 1984.

[3] Area is generally the Standard Metropolitan Statistical Area (SMSA), exclusive of farms. L.A.-Long Beach, Anaheim, Calif. is a combination of two SMSA's, and N.Y., N.Y.-Northeastern N.J. and Chicago, Ill.-Northwestern Ind. are the more extensive Standard Consolidated Areas. Area definitions are those established by the Office of Management and Budget in 1973, except for Denver-Boulder, Colo. which does not include Douglas County. Definitions do not include revisions made since 1973.

[4] Regions are defined as the four Census regions.

The population size classes are aggregations of areas which have urban population as defined below:

A-1 - More than 4,000,000.
A-2 - 1,250,000 to 4,000,000.
B - 385,000 to 1,250,000.
C - 75,000 to 385,000.
D - Less than 75,000.

Population size class A is the aggregation of population size classes A-1 and A-2.

Technical Notes

Brief Explanation of the CPI

The Consumer Price Index (CPI) is a measure of the average change in prices over time in a fixed market basket of goods and services. The Bureau of Labor Statistics publishes CPI's for two population groups: (1) a CPI for All Urban Consumers (CPI-U) which covers approximately 80 percent of the total noninstitutional civilian population; and (2) a CPI for Urban Wage Earners and Clerical Workers (CPI-W) which represents about half the population covered by the CPI-U. The CPI-U includes, in addition to wage earners and clerical workers, groups such as professional, managerial, and technical workers, the self-employed, short-term workers, the unemployed, and retirees and others not in the labor force.

The CPI is based on prices of food, clothing, shelter, and fuels, transportation fares, charges for doctors' and dentists' services, drugs, and the other goods and services that people buy for day-to-day living. Prices are collected in 85 urban areas across the country from about 4,000 food stores, 24,000 rental units, and 28,000 establishments—department stores, hospitals, filling stations, and other types of stores and service establishments. All taxes directly associated with the purchase and use of items are included in the index. Prices of food, fuels, and a few other items are obtained every month in all 85 locations. Prices of most other commodities and services are collected every month in the five largest geographic areas and every other month in other areas. Prices of most goods and services are obtained by personal visits of the Bureau's trained representatives. Mail questionnaires are used to obtain public utility rates, some fuel prices, and certain other items.

In calculating the index, price changes for the various items in each location are averaged together with weights which represent their importance in the spending of the appropriate population group. Local data are then combined to obtain a U.S. city average. Separate indexes are also published by size of city, by region of the country, for cross-classifications of regions and population-size classes, and for 28 local areas. Area indexes do not measure differences in the level of prices among cities, they only measure the average change in prices for each area since the base period.

The index measures price changes from a designated reference date—1967—which equals 100.0. An increase of 203 percent, for example, is shown as 303.0. This change can also be expressed in dollars as follows: The price of a base period "market basket" of goods and services in the CPI has risen from $10 in 1967 to $30.30.

For further details see *BLS Handbook of Methods*, Vol. II, "The Consumer Price Index," Bulletin 2134-2, April 1984.

Calculating Index Changes

Movements of the indexes from one month to another are usually expressed as percent changes rather than changes in index points, because index point changes are affected by the level of the index in relation to its base period while percent changes are not. The example in the accompanying box illustrates the computation of index point and percent changes.

Percent changes for 3-month and 6-month periods are expressed as annual rates and are computed according to the standard formula for compound growth rates. These data indicate what the percent change would be if the current rate were maintained for a 12-month period.

Index Point Change	
CPI	315.5
Less previous index	303.5
Equals index point change	12.0
Percent Change	
Index point difference	12.0
Divided by the previous index	303.5
Equals	0.040
Results multiplied by one hundred	0.040 x 100
Equals percent change	4.0

Homeownership Changes

The Consumer Price Index (CPI) has been changed to incorporate a rental equivalence measure of homeowners' costs in accordance with plans announced by the Bureau of Labor Statistics (BLS) on October 27, 1981. For the CPI for All Urban Consumers (CPI-U), this change was effective with release of the index for January 1983 and for the CPI for Urban Wage Earners and Clerical Workers (CPI-W), it was effective with the release of the January 1985 index. The rental equivalence approach calculates shelter costs of homeowners based on the implicit rent owners would have to pay to rent homes that they own. The old method calculated homeownership as home purchase, mortgage interest costs, property taxes, property insurance, and maintenance and repairs. The new homeownership component was introduced into both the CPI-U and the CPI-W in such a manner that in each case the indexes using the old and new methodologies were equal in the so-called "link month"—December 1982 for the CPI-U and December 1984 for the CPI-W. For more information, see the *CPI Detailed Report* for January 1983, pp. 7-13.

The Consumer Price Index Revision

The Bureau of Labor Statistics will begin publishing a revised Consumer Price Index (CPI) with the release of the January 1987 index in February 1987. As a result of the revision, both the CPI-U and the CPI-W will have updated expenditure weights based upon data tabulated from 3 years (1982, 1983, and 1984) of the Consumer Expenditure Survey, replacing the current expenditure weights based on 1972-73 data. The Bureau periodically revises the expenditure weights to reflect price changes of items currently being purchased by consumers.

The January 1987 CPI also will introduce a greatly enhanced housing survey, which will improve the rental equivalence measure of homeownership costs in both the CPI-U and CPI-W. The new housing sample was designed to represent optimally both owners and renters in the estimation of shelter costs.

A number of methodological and sampling advances first introduced in the 1978 revision also have been enhanced and will be incorporated into the CPI for January 1987. For example, the selection of the urban areas and the allocation of outlet samples in which prices are collected for the CPI were done by the Bureau with the primary objective of producing the most accurate national CPI possible with the funds available. The January 1987 index also will be based, for the first time, on the geographic distribution of consumers as of the 1980 Census of Population. The current CPI uses the 1970 Census of Population. The requirement to allocate the sample to provide the most accurate national CPI did result in some local areas not having samples sufficient to permit frequent publication. Therefore, beginning in January 1987, the Bureau will publish a number of local area CPI's less frequently. The areas affected by the changes in publication are identified below.

Both the CPI-U and the CPI-W published for January 1987 will be linked to the present series of each index as of December 1986 to provide a continuous series. The linking will be accomplished by setting the index levels of the revised CPI with the updated expenditure weights and samples equal to those published for the present series in December 1986. Each index will move upward or downward from the December 1986 level in accordance with subsequent changes in prices.

As in the past, the Bureau will publish selected indexes using the old expenditure weights for 6 months after the issuance of the revised CPI. Unlike earlier revisions, these overlap indexes will not be based on the old samples and will differ from the revised indexes only by their expenditure weights. The base period for the revised CPI issued for January 1987 will be 1967 = 100, the same as for the present index.

In addition to the national all-city average CPI-U and CPI-W indexes, the Bureau now publishes indexes for 28 local areas. In 1987, it will continue to publish indexes for all but one of these areas—Northeast Pennsylvania (Scranton-Wilkes-Barre). Because of the requirement to allocate the sample to provide the most accurate national CPI possible, 13 of the remaining 27 published areas will be published less frequently.

Beginning in 1987, the index for Detroit, currently published monthly, will be published only for the even-numbered months. Twelve areas now published bimonthly will be compiled on a semiannual average basis. These areas are: Buffalo-Niagara Falls, N.Y.; Cincinnati-Hamilton, Ohio-Ky.-Ind.; Kansas City, Mo.-Kansas City Kan.; Milwaukee, Wis.; Minneapolis-St. Paul, Minn.-Wis.; Atlanta, Ga.; Anchorage, Alaska; Denver-Boulder, Colo.; Honolulu, Hawaii; Portland-Vancouver, Ore.-Wash.; San Diego, Calif.; and Seattle-Tacoma, Wash. These semiannual average indexes, which refer to the arithmetic averages of the 6-month periods from January through June and July through December, will be published with release of the CPI for July and January, respectively, i.e., in the months August and February. These series will be compiled and published on their present reference bases, 1967 = 100 for all areas other than Anchorage, which is on an October 1967 reference base. Also, the Cleveland-Akron-Lorain, Ohio, indexes will be published for odd-numbered rather then even-numbered months.

Indexes also are currently published bimonthly for 4 regions, 5 size classes, and 16 region-by-size groups. Beginning with January 1987, publication will become

monthly; two of the size classes will be combined; and two of the region-by-size groups will be eliminated.

Energy Prices

Prices are usually available for the U.S. city average, 28 large urban areas, and 16 areas reflecting the four Census regions cross-classified by four population sizes. However, not all energy commodities and services are used in every area of the country. Fuel oil, for example, is not a common heating fuel in some urban areas, particularly in the South and West. Where no average prices are available, the designation NA will appear. NA will also appear if the data sufficiency criteria have not been met in any given month. For example, if there are fewer than five usable fuel oil prices for a published city or region size class, no fuel oil prices for the area will be published.

All prices, except for electricity, are collected monthly by BLS representatives in the urban areas priced for the CPI. Electricity prices are collected monthly on mail questionnaires by the Department of Energy for BLS. Prices for natural gas and electricity include fuel and purchased gas adjustments and all applicable taxes. Fuel oil and gasoline prices include applicable Federal, State, and local taxes.

Natural gas and electricity. Natural gas prices are reported in therms, which are a measure of heating value. Electricity prices are given in kilowatt hours (kwh). For both utility services, the consumption ranges specified in table P-2 are the upper and lower limits of the bill sizes priced for the Consumer Price Index. The average prices per therm and per kilowatt hour are calculated from bills priced within these ranges. It should be noted that bills priced for the CPI are not only for different consumption amounts, but may also be calculated from different types of residential rate schedules. *The average prices per therm and per kilowatt hour are not, therefore, generally suitable for use in place-to-place price comparisons.*

The average prices for 40 and 100 therms of natural gas and for 500 kilowatt hours of electricity (table P-1) are calculated from a special price collection program. They are not used in the calculation of the CPI. Since heating and air-conditioning requirements vary by geographic location, climate, and weather conditions, it cannot be inferred that these consumption amounts represent those used by a typical residential consumer. These bills are used merely to track price changes over time for constant amounts of consumption, to provide data for place-to-place price comparisons, and to provide continuity with prices of natural gas and electricity formerly published in conjunction with the unrevised Consumer Price Index.

Fuel oil. Only #2 fuel oil (home heating oil) is priced. Prices are collected, in most cases, for quantities greater than one gallon. These prices are converted to a per gallon price for this program. Fuel oil prices reflect discounts for quantity and/or quick payment.

Gasoline. Gasoline prices are collected at the pump from a sample of full service, mini-service, and self-serve gas stations.

Approximate British Thermal Unit (BTU) values for some energy items are as follows, according to the source indicated:

1 therm = 100,000 BTU'S (U.S. Department of Energy).
1 kwh = 3,412 BTU'S (Edison Electric Institute)
1 gallon #2 fuel oil = 140,000 BTU'S (U.S. Department of Energy).

Food Prices

In the revised CPI, actual weighted average prices are calculated each month at the national level and for the four Census geographic regions. As a result of changes in price collection methodology and sample sizes, average prices for individual cities cannot in general be produced. It is hoped, however, that regional average prices will help satisfy the need for local area data. It should be noted, however, that the average food prices in this report reflect variations in brand, quality, and size among geographic areas. Users of average food prices should be aware that these differences exist.

Because a number of food commodities are not available in all areas on a year-round basis, prices will not appear in some months for some regions or for the U.S. city average. In other instances, sufficient prices may not be available due to temporary disruptions in supplies. Where no average prices are available, the designation NA will appear. When a price is not available from an individual store in any month, an estimated price will be calculated for the missing item and used in computing the average price. In cases where the proportion of estimated prices used to calculate the average is considered too high, the average price will not be published and NA will appear for that item in the table.

Because of space limitations in the table, the description for each item is abbreviated. More detailed specifications are available from BLS Regional Offices or from the Washington Office upon request.

Seasonally Adjusted and Unadjusted Data

Because price data are used for different purposes by different groups, the Bureau of Labor Statistics

publishes seasonally adjusted as well as unadjusted changes each month.

For analyzing general price trends in the economy, seasonally adjusted changes are usually preferred since they eliminate the effect of changes that normally occur at the same time and in about the same magnitude every year—such as price movements resulting from changing climatic conditions, production cycles, model changeovers, holidays, and sales.

The unadjusted data are of primary interest to consumers concerned about the prices they actually pay. Unadjusted data also are used extensively for escalation purposes. Many collective bargaining contract agreements and pension plans, for example, tie compensation changes to the Consumer Price Index unadjusted for seasonal variation.

Seasonal factors used in computing the seasonally adjusted indexes are derived by the X-11 Seasonal Adjustment Method. The updated seasonal data at the end of 1977 replaced data from 1967 through 1977. Subsequent annual updates have replaced 5 years of seasonal data, e.g., data from 1981 through 1985 were replaced at the end of 1985. The seasonal movement of all items and 44 other aggregations is derived by combining the seasonal movement of 51 selected components. Each year the seasonal status of every series is reevaluated based upon certain statistical criteria. If any of the 51 components change their seasonal adjustment status from seasonally adjusted to not seasonally adjusted, not seasonally adjusted data will be used for the last 5 years, but the seasonally adjusted indexes will be used before that period. If any of the 51 components change their status from not seasonally adjusted to seasonally adjusted, seasonally adjusted data will be used for the last 5 years, but not seasonally adjusted indexes will be used before that period.

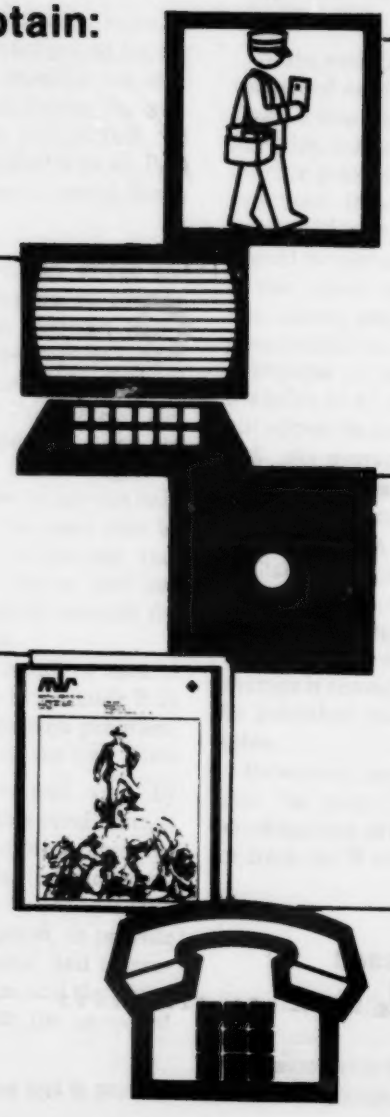
BLS International Price Data

Quarterly measures of price change for U.S. imports and exports under various classifications, useful for different types of analysis:

- SITC, a United Nations classification for international comparisons;
- SIC-based, used for industry comparisons;
- End use, for use with National Accounts data.

How to obtain:



Mailing List:

To obtain the quarterly news release, ask to be put on a mailing list. Call Bureau of Labor Statistics, Division of International Prices (202) 272-5020.

Electronic News Release:

Quickest. Accessible electronically immediately at release time through BLS news release service. Write to the Office of Publications, Bureau of Labor Statistics, Washington D.C. 20212, or call (202) 523-1913.

Data Diskettes:

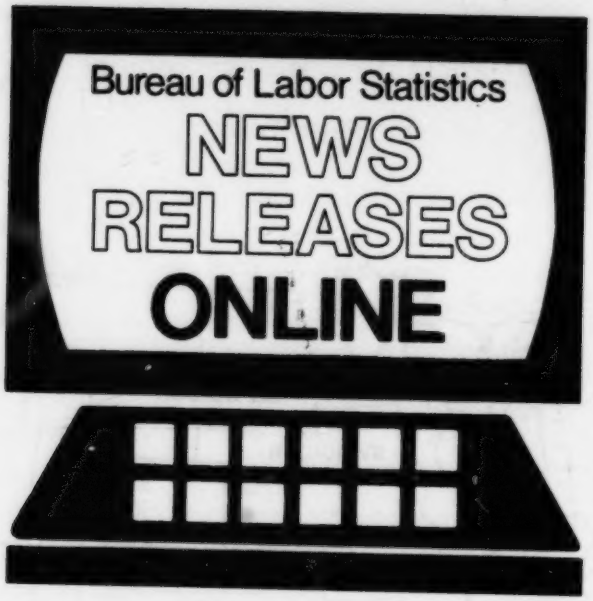
Quarterly import and export price indexes are available on diskettes for the most recent eight quarters. For information, call the Office of Publications, Bureau of Labor Statistics (202) 523-1090.

Monthly Labor Review:

Articles twice a year provide in-depth analyses of import and export price movements and developments in U.S. trade. Subscription available from Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402, for $24 a year; $4 single copy.

Telephone:

For comparisons of United States, German, and Japanese export price indexes at the detailed product level, call Division of International Prices (202) 272-5027.



Economic indicators from the Bureau of Labor Statistics are available electronically at the time of their release.

BLS makes its news releases availabe online through a commercial contractor. There is no charge for the data. Users pay only for the actual computer time used, at a rate of about $7.50 per hour for local access and about $20 per hour anywhere in the country.

More than 100 releases a year are available online, including monthly releases on consumer and producer prices, earnings, and employment and unemployment, and quarterly releases on productivity, employment costs, collective bargaining, and import and export price indexes.

Users may access part or all of a release, paying only for actual computer time used. There are no minimum or contracting fees.

For more information, use the coupon.
